MedTrak VNG is the Manufacturer and Distributor for **VNG and Balance Plate** Systems utilized for dizziness, vestibular /vertigo issues, fall risk assessment and concussion detection

MedTrak has decided to sell **direct to clinicians** for a limited time (**no sales force mark-up**)

Prices are now 50%-60% lower because we have temporarily **eliminated the sales force**

ZERO interest “In-House” financing is now available which eliminates the leasing company/bank loan paperwork and allows “problem credit” buyers **instant financing**

Our opt-out program allows you to return the equipment at any time during the finance period, which then stops your monthly payment responsibility with no future obligations

Clinicians who can afford to buy the equipment without financing will receive an additional **\$5,000 off** the wholesale price being offered by the In-House finance program

If you are interested in learning more about these special programs being offered directly by the manufacturer, for a limited time, please contact us at:

Scott Auerbach, PT President
